

Beaver County Emergency Services

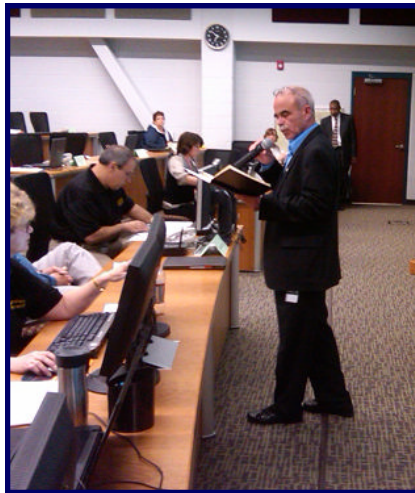

Quarterly Newsletter - Volume 5, Issue 3

ANOTHER SUCCESSFUL EXERCISE

By Bill Mahan

The biennial Beaver Valley Power Station evaluated exercise was conducted on April 20th and April 21st. This year's exercise was deemed a success, and the overall objective of protecting the health and safety of the general public was demonstrated. The 2 day event was evaluated by representatives from the Department of Homeland Security and the Federal Emergency Management Agency (FEMA Region III). A total of 71 evaluators critiqued 390 criteria at 62 action locations, and the results were judged to be outstanding.

Action locations included: the PA Emergency Operations Center (EOC) located in Harrisburg, the Beaver County EOC, 18 Municipal EOCs, 4 municipal fire departments performing route alerting, 4 support county EOCs (Allegheny, Butler, Lawrence and Washington counties), 4 support county mass care centers, 4 support county evacuee monitoring and

DIRECTOR HILL OPENED THE EXERCISE WITH THE INITIAL BRIEFING.

COUNTY EOC STAFF WORKED DILIGENTLY IN THEIR NEW FACILITY.

decontamination centers, 10 Beaver County school districts and the Crescent Township emergency worker monitoring and decontamination station.

Over 500 responders participated in the various demonstrations (a large majority of which were volunteers), and the responders were recognized by the evaluators for their service.

The organization and facility receiving the most accolades was the new Beaver County EOC. This was the first test of the new facility, and although there were some minor glitches, the facility and staff received rave reviews. The state of the art equipment was quite a change from our previous facility, and the learning curve was steep. The new equipment prompted new working protocols and challenged the EOC staff to achieve new response level heights.

The "draft" exercise report from FEMA classifies problem areas in 3 categories: Deficiencies, Areas Requiring Corrective Actions (ARCA) and Planning Issues. This year's report indicated no Deficiencies, no ARCA and 4 planning issues. These planning issues are minor revisions for either the municipal Emergency Operation Plans or for the local school district's Emergency Operation Plans and will be completed by County staff in the near future.

Congratulations to all the participants on a job well done!

THE DIRECTOR'S CORNER By Wesley Hill

I would like to update everyone on the new emergency services center, some of the other projects we have started as well as what is coming up over the summer months. We have been in operation at the new center for almost six months, and what a time it has been. We have had visitors from far & wide coming in to see the building, as well as the new computer aided dispatch system, and the county's new mapping project. When all tied together, it is quite an impressive package. We have had nothing less than outstanding reviews on all parts of the project. We will continue to enhance the system, which in turn will provide services for years to come for the residents and the businesses of Beaver County.

Since our opening, we have been in full swing with day to day operations, disaster response, as well as moving forward in our planning and training requirements.

In February, our County was hit with several major snow storms causing local, county and state emergency declarations to be filed. Currently, FEMA & PEMA staff members are working with county and municipal representatives to insure that proper documentation is filed in order for reimbursements to be claimed for snowstorm related expenses. A lot of work and time was put into getting us to the point of being reimbursement eligible, but I feel comfortable in saying that, for the most part, all those who dealt with the piles of paper should see some reimbursement in the near future. Good job done by all.

In April, we were tasked with the Beaver Valley Power Station biennial exercise. I won't go into much detail regarding the exercise other than to say that, once again, our responders and all of the volunteers did an outstanding job, and the federal review showed no negative comments. All goals and objectives were met.

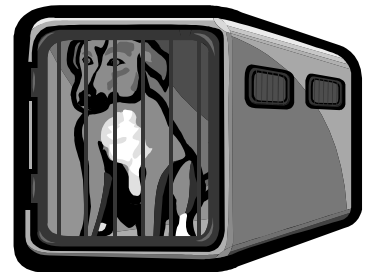

As the days of summer approach, we look forward to supporting all those who plan summer events. Due to numerous issues, our county's summer events will probably see larger numbers. Hopefully everyone will get some time to spend with their families and friends. As we enjoy the summer months, I hope that everyone remembers our troops who continue to serve and protect while we enjoy the freedom that many others only wish they could have.

I hope everyone has an enjoyable summer, and please remember: Be careful. Be safe.

BEAVER COUNTY CART UPDATE By Debbie Miketa

The Beaver County Animal Response Team (CART) has received some new equipment to help in case of an emergency in the County or surrounding areas. A trailer and other necessary equipment, such as leashes, crates, and food & water bowls, was made available & delivered to the county from the PA State Animal Response Team (PA SART) earlier this year.

The Pennsylvania State Animal Response Team is a coordinated effort between several governmental, corporate, and private entities dedicated to the preparation, planning, response, and recovery of animal emergencies in Pennsylvania. The team's mission is to develop and implement procedures and train participants to facilitate a safe, environmentally sound and efficient response to animal emergencies on the local, county, state, and federal level. Joel Hersh, who heads up the PA SART Team, has been instrumental in helping Beaver County form its CART.

The coordinator for BC CART is Dr. Bryn Van Way, from Brodhead Animal Hospital. She has gone above and beyond in her assistance with getting this team underway. Stephanie Glenz is the team's Small Animal Chairman, and Jared Pearsall is the Large Animal Chairman. Together, we are hoping to assist the County if an emergency arises to aid our citizens with their pets.

This organization is comprised of volunteers, and assistance is always needed. If you are interested in volunteering your services with the Beaver County CART team, please go to the PA SART website at <http://sart.cas.psu.edu/Default.html>. Once there, look for the county link, and it will give you the information needed to become a volunteer.

CYBER SECURITY WORKSHOP HELD

By Madeline Marcenelle

ROBERT BUTLER, OF FEMA CYBER SECURITY, ABOVE, ALONG WITH MARTIN LINDNER, OF CMU SOFTWARE INSTITUTE (NOT PICTURED), LED ATTENDEES IN DISCUSSING CYBER SECURITY CONCERNS IN TODAY'S INFORMATION TECHNOLOGY DEPENDENT WORLD.

The Pittsburgh Federal Executive Board, in partnership with FEMA Region III and Duquesne Light, recently hosted the Resilient Accord Cyber Continuity of Operations Workshop for representatives from Region 13 first responders as well as area businesses. The education and discussion oriented workshop provided an opportunity to discuss the cyber resiliency between the two sectors and what can be done to anticipate, prepare for, and mitigate cyber security issues. The two-part workshop opened up with a general history and conversation about the evolution of cyber attacks, which led into the threat trends facing today's society. This was followed by an open dialogue with the group about how different private sector entities and local government bodies incorporate cyber security in their operational planning.

Though cyber security is a difficult and rather dry concept to dissect, Resilient Accord managed to bring diverse groups into a comprehensive discussion on the partnership that's required to manage the changing cyber environment. Cyber security is most commonly coupled with the idea of protecting one's personal assets, and while the first attacks were geared toward pranks and thieving from personal accounts, times have changed. The internet has evolved from being used to complete menial tasks to encompass most facets of every day life. Because of this reality, everything that touches the internet or a networked system is vulnerable to malicious intent. This is true not only for the citizen as an individual but also for national security through to public healthcare, areas increasingly dependent upon the information technology sector. Since the conception of supervisory control and data acquisition (SCADA) systems, everything down to the water we drink has been touched by some technological process.

The emergency services haven't avoided the increasing reliance upon these cyber system advances any more than private sector businesses have. The emergency services sector (ESS) of critical infrastructure has many interdependencies, most notable of which is the information technology sector. Information received through emergency services communications requires that it be delivered to first responder personnel in real time, and integrated information is critical to multi-agency emergency responses. For this reason, it's important that cyber security forums, such as that provided by the Resilient Accord workshop, be populated by members of emergency services so that they don't fall victim to the same threat trends private businesses face. Because the ESS is the primary protector of all other critical infrastructure and key resources, continuity operations plans have to integrate ways to harden their technological assets against current cyber threats.

If the information shared during the workshop is of interest to your agency, please inquire about the Resilient Accord power point or the different federal resources available to both private and public assets.

Madeline Marcenelle is the Critical Infrastructure & Key Resource Analyst for the Region 13 Task Force. She can be reached at 412-255-2633 or madeline.marcenelle@city.pittsburgh.pa.us.

NARROWBAND - IS YOUR EQUIPMENT READY?

from the U.S. Department of Justice

Private land mobile radio (LMR) systems, including municipal government and State and local public safety systems, use blocks of radio spectrum called channels. Historically, LMR systems have used 25 kHz-wide channels. In December 2004, the Federal Communications Commission mandated that all private LMR users operating below 512 MHz move to 12.5 kHz narrowband voice channels and highly efficient data channel operations by January 1, 2013. This migration complements a National Telecommunications and Information Administration mandate for more rapid Federal agency migration to 12.5 kHz narrowband operation by January 1, 2008. The earlier Federal deadline affects State and local FCC licensees that interface or share frequencies with Federal radio systems. Using narrowband channels will ensure that agencies take advantage of more efficient technology and, by reducing channel width, will allow additional channels to exist within the same spectrum space.

Deadlines:

To phase in the migration deadline of January 1, 2013, the FCC has established interim deadlines. The first important deadline is January 1, 2011, after which:

- The FCC will not grant applications for new voice operations or applications to expand the authorized con-

tour of existing stations that use 25 kHz channels. Only narrowband authorizations will be granted.

- The FCC will prohibit manufacture or importation of new equipment that operates on 25 kHz channels. This will reduce the availability of new equipment for legacy radio systems and will affect how agencies maintain and upgrade older systems.

PUBLIC SAFETY AGENCIES NEED TO AGGRESSIVELY DEVELOP A STRATEGY TO MEET NARROWBAND DEADLINES TO AVOID CANCELLATION OF EXISTING WIDEBAND FCC AUTHORIZATIONS.

Planning for the Move to Narrowband:

Public safety agencies need to aggressively develop a strategy to meet narrowband deadlines to avoid cancellation of existing wideband FCC authorizations. Although the migration deadline may seem far off, the long lead time and interim deadlines make it necessary for agencies to plan well in advance.

Assess current equipment and start planning. To prepare for the migration, public safety agencies should start assessing their radio systems and planning for replacements or upgrades. They should inventory their current equipment to ascertain what can be converted to 12.5 kHz and what will need to be replaced before January 1, 2013. Most new equipment has the capability for both 25 kHz and 12.5 kHz operation because any VHF/UHF radio equipment accepted by the FCC after February 14, 1997, had to have 12.5 kHz capability. The 2.5 kHz narrowband equipment is available in both conventional analog FM and digital formats (such as Project 25), so narrowband conventional FM systems will be compliant. Local governments should develop contingency plans to ac-

commodate system changes for both public safety and nonpublic safety systems.

Obtain new or modified licenses.

To move to narrowband operations, agencies must apply for new frequencies or modify existing licenses. An agency that is licensed for a 25 kHz-wide channel is not guaranteed two 12.5 kHz channels. Licensees will have to justify to the FCC why they need additional channels. Consideration of applications for new narrowband licenses will follow the same process as a new license application. As agencies migrate to narrowband operation, however, the pool of available frequencies will increase.

Key Points About FCC Narrowbanding Requirements:

- Most current public safety radio systems use 25 kHz-wide channels.
- The Federal Communications Commission (FCC) has mandated that all non-Federal public safety licensees using 25 kHz radio systems migrate to narrowband 12.5 kHz channels by January 1, 2013.
- Agencies that do not meet the deadline face the loss of communication capabilities.
- Agencies need to start planning now to migrate to narrowband systems by assessing their current radio equipment and applying for new or modified licenses.

EMS UPDATES

By Eric Brewer
EMS Coordinator
ebrewer@beavercountypa.gov

ESF #8

During Emergency Operations Center (EOC) activations and under the National Response Plan (NRP), there are different Emergency Support Function (ESF) positions throughout the EOC including everything from EMA to Agriculture representatives. During a full EOC activation,

all ESF positions are filled by a representative from their respective agencies. Since being in our new building, we have utilized the EOC for both exercises (Beaver Valley Power Station Exercise) and partial activations (February snow storm).

You may have heard of ESF #8, but what exactly is it? ESF #8 is the Health/Medical position in the EOC, this position could be filled by one person or a group of people, depending on the scale of the incident. If we would need to evacuate a nursing home or medical facility, this position would be responsible for contacting ambulance services in and out of Beaver County to obtain resources for the evacuation. If there was a public health emergency, the ESF #8 position would expand with the assistance of PaDOH, local hospitals, mental health agencies, EMSI, the Red Cross, local EMS, and whoever else would be involved with the health and medical aspects of the specific event.

When incident needs challenge or exceed the medical or public health response capabilities of local, State, Tribal, or regional response assets, Federal public health and medical assistance may be made available under ESF #8 of the NRP. This support may be provided in response to a variety of public health and medical events, including the following:

- Natural and man-made disasters and public health and medical emergencies
- Terrorist threats or incidents using chemical, biological, nuclear/radiological, or large explosive devices
- Infectious disease outbreaks and pandemics
- Animal health emergencies, such as those in support of ESF #11 (e.g., Bovine Spongiform Encephalopathy, Hoof and Mouth Disease)
- Any other circumstance that creates an actual or potential public health or medical emergency where Federal assistance may be necessary.

Federal public health and medical assistance provided under ESF #8 of the NRP may be categorized according to the functional areas described below.

1. **Assessment of Public Health/Medical Needs:** Upon request, mobilizes and deploys ESF #8 personnel to support the Emergency Response Team to assess public health and medical needs.
2. **Health Surveillance:** Coordinate with State and jurisdictional officials to monitor injury and disease patterns and potential disease outbreaks.
3. **Medical Care Personnel:**
 - a. Medical response capabilities are provided by assets internal to Beaver County (e.g., USPHS Commissioned Corps, the National Disaster Medical System).
 - b. DoD may be requested to provide support in casualty clearing/ staging and other missions as needed.
 - c. Beaver County may seek individual clinical health and medical care specialists from the VA to assist State, Tribal, and local personnel.
4. **Health/Medical Equipment and Supplies:** Beaver County may request that agencies provide medical equipment and supplies, including Federal Medical Stations (FMSs), pharmaceuticals, and biologic products (e.g., SNS).
5. **Patient Evacuation:** Beaver County may request assistance to provide support for patient movement in the evacuation of seriously ill or injured patients from the affected area to locations where hospital care or outpatient services are available.

Continued on next page

EMS UPDATES CONT.

6. **Patient Care:** Beaver County may request available personnel to support in-hospital care and outpatient services for victims who become ill or injured.
7. **Safety and Security of Human Drugs, Biologics, Medical Devices, and Veterinary Drugs, etc.**
8. **Food Safety and Security:** In cooperation with ESF #11, ensures the safety and security of Federally regulated foods.
9. **Blood and Blood Products:** Establishes and maintains contact with the American Association of Blood Banks Inter-organizational Task Force on Domestic Disasters and Acts of Terrorism and, as necessary determine the need for blood, blood products, and the supplies used in their manufacture, testing, and storage.
10. **Agriculture Safety and Security:** In coordination with ESF #11, ensures the safety and security of animal feed and therapeutics.
11. **Worker Health/Safety:** Department of Labor (DOL) assistance to coordinate responder and worker safety and health using processes detailed in the Worker Safety and Health Support Annex.
12. **All-Hazard Consultation, Technical Assistance, and Support:** Beaver County with support from PaDOH assesses public health and medical effects resulting from all hazards.
13. **Behavioral Health Care:** Assessing mental health and substance abuse needs and providing disaster mental health training materials for disaster workers .
14. **Public Health and Medical Information:** Provide public health, disease, and injury prevention information that can be transmitted to members of the general public.

Emergency Support Functions:

ESF#1 Transportation	ESF#9 Search and Rescue
ESF#2 Communications	ESF#10 Haz Mat
ESF#3 Public Works	ESF#11 Agriculture
ESF#4 Firefighting	ESF#12 Energy
ESF#5 Emergency Management (EMA)	ESF#13 Public Safety/Security
ESF#6 Mass Care/ Housing / Human Services	ESF#14 Long Term Recovery
ESF#7 Logistics/ Resources	ESF#15 External Affairs
ESF#8 Medical Services/ Public Health	

Upcoming EMS Dates:

June/July	Tentative Region 13 ESF#8 training / table top exercise
June 8	Firefighter Rehab/ Medical monitoring / CCBC
June 11,12,13	Camping for Con-ed / Coopers Lake
July 8	Region 13 MMRS General Meeting / Allegheny County
July 25	EMS Training Picnic / Brady's Run Park (see flyer in this newsletter)
August 10	Beaver County EMS Meeting / Beaver Co Emergency Services

The County has awarded the bids for the purchase and installation of 3 new communications towers and related equipment, which should greatly enhance Fire Communications. Construction is scheduled to begin June 14th, with completion scheduled for the fall. A 100' tower will be placed at the 911 center, a 250' tower will be erected in Baden, and a 150' tower is planned for Midland. Additionally, work is in progress to put a 4th tower at 150' in Hanover Township.

The new system will be Simulcast, which means all Tone and Voice will be sent over 5 towers all the time, and there will be 6 receive sites. Computer generated propagation maps show a 95% coverage area for a portable on your hip.

There will be some programming changes to go along with all of the work, and those will be addressed once all changes have been decided upon and licensing has been granted. With the FCC ruling requiring all frequencies to be narrowband by 2013, it is more than likely going to mean a change in the dispatch frequency also.

As an update on our channels and repeater sites:

- Channels 2, 6, 9, 12, 13, and 14 are all non repeated and are all operational at this time
- Channel 3 South Beaver repeater is out of service, however the dispatch base is in-service
- Channel 4 Midland repeater is in service
- Channel 5 Beaver Fall repeater is in service
- Channel 7 North Sewickley repeater is in service
- Channel 8 Harmony Repeater is in service
- Channel 10 Hookstown repeater is in service
- Channel 11 Independence repeater is out of service

FIRE SERVICES UPDATES

By David Trzcianka

Fire Services Coordinator

dtrzcianka@beavercountypa.gov

NEWS & NOTES

- Justin Moore is the newest person to be welcomed into **9-1-1 dispatch training**. He joined the current group in late May for APCO Training.
- Victor Spinelli is conducting **Mask Fit Testing** and issuing **County ID badges** every Wednesday from 9 am to 3 pm. Appointments are required for both services. Please call Vic at 724-775-1700 to schedule an appointment or for more information.
- **Municipal Emergency Management Coordinator quarterly training** is scheduled for Saturday, June 19th. Please call 724-775-1700 to register. Topics covered will include:
 - ◇ Certification level training on EMA Coordinator duties & responsibilities
 - ◇ A review of Title 35
 - ◇ Discussion regarding Municipal Emergency Operations Center regionalization, and
 - ◇ An update on municipal planning formats & requirements.
- **Hazmat Refresher Training for Law Enforcement** will be held on Wednesday, June 23rd, Thursday, September 23rd, and Thursday, December 16th. All classes begin at 1 PM and will be held in the front meeting room at the Emergency Services Center in Ambridge. Please call 724-775-1700 for reservations.

EMSTRAININGPICNIC2010

Come join us for a day of fun, socialization, games, food, and training. Bring your family; they will get the opportunity to interact with you while you perform your job and will get to debut as actors carrying out the role of patients in training drills.

This training is designed to include the whole family as we come together as EMS services that support the residents and visitors of the municipalities in Beaver County. We will set up mass casualty events that will allow us to work together to solve the challenges that are brought forth, identify any areas where we can improve, and learn together while having fun.

We will have a brief refresher on incident command, EMS positions under the ICS, and triage. We will then carry out a drill, eat lunch, critique, drill, eat dinner, socialize, play games, and enjoy a family picnic.

CONTINUING EDUCATION CREDIT WILL BE PROVIDED

Sunday, July 25, 2010

Brady's Run Park

Shelter # 18

0800-1700

Picnic will continue through the evening

Please pre-register by July 15, 2010 so that we may plan accordingly.

Sponsored in conjunction by: Medic Rescue, Beaver County EMA, Northwestern EMS, Economy EMS.
We train to overcome our weakness and master our strengths!

The Beaver County Emergency Services Newsletter is created and published by the Beaver County Emergency Services Center (BCESC).

The BCESC is a division of Beaver County government, under the authority of the Beaver County Board of Commissioners. The BCESC manages the county's 9-1-1 dispatch operations center and also serves as the county's Emergency Management office, working under the direction of the Pennsylvania Emergency Management Agency (PEMA) on emergency preparedness, planning, mitigation, response, and recovery. The BCESC is also the home of the county's Hazmat Team 700, the Public Safety Commission, the Local Emergency Planning Commission (LEPC), and is the contact point for many other public safety organizations, including EMS, Fire, Police, and Municipal EMA services.

The BCESC works in conjunction with a number of county and offsite agencies to provide comprehensive public safety guidance and emergency support to the residents and businesses of Beaver County.
